began excavation on the 20th of April.
Need to call Linda Hamilton to get money:

1. We have $960.00 in cash.
   - $780.00 needed for per-diem for 13 people for 5 days.
   - $468 for 3 days per diem.
   - $312 for 2 days per diem.
   - $180.00 left in cash for other purchases.

2. Please wire about more money. ($800)

3. Talk to John about water & tank. — Maybe phone him this pm.

4. Talk to Charles about Bob & Jill.

5. Call Old Dominion Medical Center.

Foggy & Giggly today.

Tomorrow 10:00 am. — 356-5700

get typing paper & manila envelopes.
MONEY RECEIVED: 
$2500  4/16/87

SPENT 4/18 - 4/23 (M-TH) 
549.56  $7 per diem

AMOUNT REMAINING: 
1950.44  BUT 1000 IN CHECKING 
NOT AVAILABLE UNTIL NEXT FRIDAY (4/31) 

780.00 RESERVED FOR NEXT WEEKS 
PER DIEM OF 13 PEOPLE.

4/29 - EXPENSE REPORT — 
483.73 for 3 days per diem 
and expenses through Wednesday.

ALSO — 300.00 for Thursday & Friday 
per diem.

TOTAL: 783.73

TOTAL SPENT IN 2 WEEKS: 
$1333.29

REMAINDER 1166.71.
Cris for Monday 4/24/87

1. Billy Ray:

Ches VA:

BR quickly proving there is no intersected stratum with F.6. F.73 appears to about F.6 but not be cut by it. We'll try to prove this. Going to change 2x2 to start deepen more of the wall to get more info. I think Jann, Billy Ray, I believe that to be correct.

Ches IT:

Adobe opening 2, 2x2's, on eastern side of the hyphen. The northwest 2x2 appear to be showing a wall in the layer beneath the clay cap. Seems this could be part of the chimney with wing. Cave has flared deep and directly north of "hyphen" not far enough to indicate the opening of the cave. Also, west of hyphen approx. 1.5m there are brick wall. Wall running N-S. Doesn't come out as far as "hyphen" wall. Has a square brick muffle feature directly north of it.

Opening a third 2x2. Cracking off clay cap in 2x2 in area "U" 1.5m beneath.
Expense 5/6
Withdrawal 350.00 to cover per diem.
Spent 312.00 on per diem.

Withdrawal 350.00 for per diem + gas
Spent 310.00 on per diem.

Other:
Gas 22.70
Patent .39
Wax handle 10.06
Water pipe adapter .35
Area IC — 2 2x2s along 5' wall of massive house.
Clay deep over each unit. Door leading in whole system should be flat may be a ledge line to the south. Also a distance from the edge of the wall indicating another cave.

4/30

Area VI — have located unit to the west of area previously excavated, following unit F73. Continues straight east 27. No turn. Also well appears not to be cut by F6. It appears built after F6. Small gap between foundation line of wall through to inside possible LAP board wall of F6. There are artifacts located 7' in new 2x2, one percent of plate and one apparent stable (lag iron). Also possible worked glass. All in eastern area.

HIRE 5 MORE PEOPLE!!!

Talked to State Highway about closing water track on their land. No problem.

Rain day. 5/4
Hired Tom Carmody for 5/18 room. Switch D.W. to
5/13-14
TOTAL: 347.00 spent.

5/18 withdrawn 200
5/18-kept 200 onto per diem

5/19 rain: spent 384.00 Check

PLASTIC 138.60
GAS (future junk fat) 17.50

175.90

TOTAL: 535.90
5/8 Room

Continuing work in VT until get direction otherwise. Charlie invented test using hot water of VT action. Hypothesis: F 73 may be an addition onto F 6. F 73 appears to stop in unit 116 and when it was found (in 2x2), two tests were made.

Curt and Dennis removing test from area 1 and NB. That is will be made unsafe by excavation. Area PA continuing checkboard.

Ann bought black plastic today (1 roll).

Area C: Opening new unit for enough south to allow arch bridge over to Area 1.

Deep units directly south of Mission House and main feature. Unit of the south being put in as not expected to have so many features.

To Do: 
13 people, 2 days $312.80

13 x 20 = 260
52 1/2.
Change of position.
Norman Mackie to crew member (Bobby from filing in until new crew chief located).

5/13 Norman Mackie quit today.

Billy Ray (30) 277-4124
Call Sandy about water & backhoe.
Pick up camera battery EPX 13.
Ask Fred about fish scales.
Call potential crew members.
Ask about harp.

Area VA: No kingfisher eggs for E46. Station photos SRAV work well. In future need to make new large structure or large feature, feature forms.

5/7/87
Tell John:
(1) new crew members.
(2) Betty's situation.
(3) Camera.
(Can't necessarily in this order)

Need 1 socket 250 light for pocket set.

Need Ken Gilson.

In Area E4A only remaining 19th century features so far. 18th century may only remain at very edge of Area E4A to the north.

Area VA - have been given free reign time-wise. Going after architectural features and trying to figure out F73. Old
theory of F72 being an earlier
structure in dark. Maybe
an addition to F6 on that side.

Interesting things in F6:
Carefully made caisson buried
in an spot over the stage and
the reddened clay. Could this have
been a fire charred site and the
heat of the fire reddened the clay?
Also appears side wall may not be
perfectly regular.

Area F6: Very deep soil went
to the large. Much shallower
a few ft away to the north.

Filling in eastern unit
to south June 6, 1987.

5/11/87

Bohlebore driver arrived and
began work at 11:30 am. Yet
came away. Cost: $42 per
unit and a $75 moving
charge. Billed to Westchester.

Here old receipts from
Othmer.

Here exposed even half of
foundation of marble house
today. Almost every sq ft in
the cellar. Doesn't look like
we'll need Othmer all week.

90° today

Fogier today, threat of afternoon

5/12/87
Continue to remove cellar debris. Cisterns had to be dug up and eastern marble porch before backhoe sets upon it to reach back of cellar. At Charles suggestion, we will lay down plastic and cover the porch before the backhoe is in play.

REMINDER: TALK TO CHARLES & JOHN ABOUT A PROFESSIONAL SAWYER TO REMOVE VERY LARGE TREE AT EDGE OF MANOR HOUSE IN AREA FC.

Appears cellar was divided into several rooms splitting the front half from the back.

F.P. ENTRY

BERRY DEEP HOLE

PLASTER $ DIRT $ BRICK $

5/19/81

Arrivals for 5/18: Tom Casey & John Fleming

FB: 11m x 20m = 220 of 360 sqm.

Need 140 sqm excavated. (90% of area)

John arrives today between 10/10:30
TOTAL CREW TO DATE: 5/19

N.E.E.D.

Aud 324, 60 for next period.
Leaves 560. 40 to plan c57 in account.
We lost three possible original
freemasonry organizations.

Expand around F73 to catch
edges of the fill which surrounds it.

Check John what types in cell to hole
proper.

Much more of the bound wood
floor has been exposed.

Several artifacts from the
change of the floor. Allan

Other structural pieces that
including very fancy hinges and
a door lock mechanism on
a little shelf (and also).

Now

collapsed wood planter in
the hole from the walls.

Apparently larger hole than
the one described with earth
excavated.

Then planter was re-embedded
and fill or replaced behind the
planter. Any diagnostic
artifacts from behind the
fill are detached.

* TUES. MAY 26, 1987

Richard Hughes went to
site. John will be here.

Tell Charles.

Checkboard pattern. Beginning to open units around the possible churn to define its edge and see how much dumping has taken place. The restored grass made of sods and mantor around the edge of the manor house appears discontinuous. It does not extend to the east around the corner of the manor house.

If there is a break in the sodden wall west in the next 1x1 unit, it appears from the units George and I examined last time, then we may have the edge of the north wing (if it exists). Two of man-made foundation wall extensions extend from remainder of the wall, above this, if it is real and not just a print of Realty Co. probably below the ground surface. Several large post holes have been found which Guille believes date from the 19th century. These are below the clay cap. They are in range of the posts found in area I bent post as deep.

One large one is located very close to the northeast corner of the fence.
Rooms designated A - F beginning at the NW corner moving left to right, north to south.

**MANOR HOUSE FOUNDATION CELLAR CONFIGURATION**

# = brick floor, older.
0 = concrete artifact in floor.
P = plaster.

M = brick feature (in cellar).

= dark artifact bearing soil in gap in brick floor.

XXX = newer brick associated with.

? = unknown.

= unknown.
Inside the room on the upper construction level are the small interior walls which divided the lower house floor into 6 rooms.

In the lower house the central deep room in the eastern half contains evidence in the plaster on the wall and in the slant of one brick along each wall of the room that meets the east wall of the manor house. The plastered bricks are held at that angle by a large pile of mortar beneath them.

\[ 111 = \text{meter} \]
\[ 3 = \text{plaster} \]

Area IC appears as being located edge of natural terrace of a buried AV horizon beneath the fill of the artificial terrace. The natural edge appears to be at least 5.6 m (six) from the artificial edge to the N.

Area IB, Bell has exposed cobles in Sunn's along the wall. He will remove these once they are mapped and photographed and continue on - looking for other features.
5/21 Crew present:

Caryl Schildmeyer
John Van Zandt
Dave Weinstein
Jana Foster
Katherine Flemming

Bill Bonnette
Bucky Romon
Mark Wood
Ann Davis
Bonita Rose
Bob Fett

Judy Fleischknecht
Bonnie Meaffair
Tom Carney
Erie Johnson
Dennis Ray
Kathy Cellum

Betty Greene
Jeanne Ward
Jeff Atchley
Clint and Marcie.

Do 2 Henri Matisse - one in Billy Ray's, 1 in Cecil's area. The switch. Probably won't last night. Example Charles gave 1st. Keep up on interpretation of the site. Steve crew chief.

Upton Hall - Architecture - 1st session.

Upton article on Architecture vs social studies.

Trip to Westchester:
80224 - from site.
86567 - to site.

Richard Hughes arrives today.

Helen Monday: 5/23/87

Billy Ray

Dennis

Jane

Katherine

Jeanne was due to leave at 11:30am. 5/26

John Van Vorst is sick. Chuck has NOT come. Linda is
writing $100.00 down to back. Should be there this pm. Open
until 5pm. Mon. —— 5/27/87

Area TA:

Several large part of the features
removed from area. Remaining 1/2 of cobbled feature
found along northern wall. W lots of pot debris rest
against it. Need elevations on
wall portion to see if they are
the same or nearly so.

* RETRIEVE JEANNE'S TOPO MAP OF
AREA V'S FROM WEST CHESTER *

Cloudy today. threat of rain.

D.W. slow in unit.

Doug Money last, 1st day on site.

Most of this excavation experience is
from London.

In TA 3 of cobble, around 0.2
are a splash guard their cove
content have extended more than a
foot beyond the wall line.

Last beginning excavations
around site.

Area DB - 20% work at present, 60% of area completed.

Area FC - Following in laying of shell & cable in first trench. Have completed approx. 10% of this area. Also searching for entrance edge in another trench.

* People need more motivational push! Often.

Had shots taken yesterday of cleared F60, 73 and their construction details.

Area VA: lots of domestic artifacts in the red "clumped" material against the burned cleansing platform. Has settled levels in it too. Purpose unknown. In one against green clay against platform which acted as a water basin.

NEED:
1. Graph paper - "conrpr" line
2. Gutter spikes
3. 2 Wheelbarrows

Next FL - Judy will be gone 5/29 - Cecil will be gone.

Area FA - Around center:
Two layers of brick - on top is the distinctive debris from the fire.

and destruction of the manor home. In the NE 2/4 is a mound of clay beneath that just a circular line can be fitted between the destruction debris alone and a second layer of debris rubble in the clay cap beneath — all of which is crowned brick — as whole bricks in the clay, halved at the largest.

SD: The brick rubble forming the clay cap is a separate event from the destruction of the manor house — it also covers the cobble splash guard by the low wall.

Cuts - 6 sections - 2 non-rounds - blue metric graph paper approx $35.00

If not for ready supplies an $800+ Partly short in stock

Will send quickly

Faction IA are preliminarily excavated into subway vault. All pith tubes are getting salt glass out of main post. Chinese pieces from the fill above the vault in east portion of the area. Two large path holes contain brick.

6/18-6/26:
- Pay 2 days per diem at $348 per day.
- If the 8,000 checks arrive, no problem.
- Nothing can be bought with that money.

Company owes me $6.00

440.00 + 15.20 = 455.20
6/1/87

- Chef meeting 8 am.
  - Show areas; what's done, where keys go.
  - Starting time: 7:00 am - have no Cosmos yet.
  - Give 'em the "pep" talk.
  - Ask if there are "problems."

- For Bill at 7:22 am. No Cecile yet.
- Judy yet. Cecile wasn't told.

- Need to find out where to go next.
  - Need to get info from John or Charles about continuing French Fe. Aug.

- Call few people while out; get 2:30 to 3:00 am. I come out & give
  - estimate. James didn't do it!

- REMINDER: Chef needs to be interpreting more, so do I; send chief, so do I.

- T: 2 classes of past holes:
  - Large square holes
  - Small round holes
  - Smaller of brick wall

- Possibility of 3 nutmegs in VA.
IC: Possible prey location.
Later 18th century.

**TOMORROW AM**

1. get cubic meters per person or square meters per person for hay.

2. figure out how many cubic meters are in Area A, excluding stones.

Break down in cubic meters per area: 31 effort per day.

John Wilson arrives 6/10/87.

**Area A = 158 square meters in Area.**
**Average cubic meters**
**Meters calculated at 30 cm depth = 45.6 cubic meters.**

37 square meters in progress completed. 11.1 cubic meters

* Average 4 people per area per day over 22.5 days (for all areas)

Area A 15 cubic meters per person per day.
Area TLC: 50 square meters,
Averaging 50 cm deep,
25 cubic meters.
0.27 cubic meters per person per day.

Area VA: 24 x 1's. 20 m - 2m deep.
1 m deep average. 1.26 m per person per day.

6/2/87

Going to switch techniques in Area TA. After finishing current features will finish checkboard and start excavating features now.

① Get soil chemistry for square between shovel tests in VB.

② Excavate a sample of features in VB. Open up some space in between in VA.

③ Get 4 people to do 5 2 x 2's.
57 1 x 1's 57 in 2 x 2's.

④ Open up the celler hole in the main room. Walk around the antiaft which will show it in profile. (Put in both spot 1 deep cellars.)
220 m²
1.5
330
30
11.0
Cone opening the cellar — the dark stain in the center of the "inborn room" and the area around the artifact room D & E.

Billy Ray will remove 2 2x2 wide trenches, one across the southern end of cellar including the miller's truck.

July — Removing 1x2 above prehistoric feature (Eric, Dorni 1 in 2x2 to growth of brick rubble concentration to try to find its boundary. Taking down "tree" feature to determine its true nature. Will be moving east to west near the manor house below the claimed "road" for the drilling crew.

#Go to Bank & call King need more film and new bags - brown paper

Art. #32 tomorrow & pick up Addison Cemetery Report. Call Charles after work for move.

Closed out by rain at 3:15 PM
Bailing areas in the early A.M. 6/5/87
Clean today. Chased bug out at closing time the last two days.

Charles will be out. *REMEMBER:
Get Janice's topo map from West Chester!*
Plunge artifacts in the bottom of the
Van,, Met Ken at 9 AM tomorrow.

When replace B.M. then maybe put B.R.
On mapping area permanently.

**Area A** - Large - irregularly deep pit,
full of re-deposited fill. Long narrow trench.
Very few artifacts. Very deep. Extends (in down
cross) to water table. Cuts through the
line of water - well running east-west.

Brick rubble feature continues N from
natural terrace edge. The feature in
Given A is prehistoric material.
May be over 2 m long.

**Area F 5** - Found apparent well in deep section
do the cellar.
The artifact in Room F was recently a part
in the floor and subfloor. Soil and
began very soon. Yellow floor layers.

**Area EA** - Contains checkboard pattern.
Once completed will remove unit
between the past. Then concentrate on
the eastern. No other work to be done in
the area.
Our VA: will cut a beam along Swall of cellar and along east wall in N/S.

Our FO: in "kitchen" have exposed seven floor layers. Same pattern as in Room A and at same level. Will cut through a 1x1 worth and then purlin the 1x1 to the west at midline.

Both floors in Room A & B.

"WE NEED"

1. more access to trophies
2. an oven, insulated cooled
3. more storage space
4. another (water) trough
5. another 'walkin in' extra?

MAKE MORE $$$

#NOTE: 200 more time cards will be waiting for me in West Chester.

Let's like appear Aboriginal feature in the complex very long. One point, either Lake Archean or Early Woodland and one glacial or organic shaft removed. Deeply cut feature by accident, very vague claim to discriminate from surrounding soil.
Area TC: Blayer overlaying
brick feature at south end.
Area contains mostly 18th century
materials except at interface between
topsoil + B, Large alteration
feature of prehistoric material
continues.

Area TB: Apparent well in Room D,
brick lined, good gray at floor
surface on eastern half, several
mt of top brick appear to have melted on
them but they are very regular. Diameter
= 4 ft. just a little less.

Does the wall in kitchen go then
lower floor or rest on top?
Bottom floor lower bricks have dark
brown soil between the two brick
layers. Q: does lower floor merely come
as I base for the upper layers or are they
2 distinct floors.

Area TA: Marks pit: fill layers from
construction period. Feature 17 in
the fill dug into pit fill.
Construction pit includes F73 + F6,
stepped into cellar. Both levels
1981 (?)

In the "well" in the cellar -
Now going down in arbitrary room
level. Still in layer "M" debris.
Designating layers M', M", etc.
Future Budget: 9100 hours –
40 hours per week.
Slight increase through 1st of year.
Break off one week before Christmas.

Area 12

2+9 interaction

Army to be removed.
Tell crew chiefs appear to be working until Christmas.

"A remnant to the crew."

Area 10 & 11 will also be done as will area 4.

Remember in spring for 300 feet.

May wash the survey water front panels.

Soil tests at 50 intervals in
Area not tested in Area VB.

John Milburn, Tyrell Bastian
6/10/87

Fills Henry as well as John McCorkley
Charles Check to be here today. Also
Monroe Tree Service to arrive for
"free estimate."

The deep feature at the 15 foot of area IC that you dollar the water table
States a thousand times and becomes a
and becomes a branch.

Need Overall Drawing of our area once we have graph paper!!!

VAGIC.

Fire plan being moved in DB.

Starting of fire box seven. Well in down even 1m and is still filled up inside cab. They be completely filled with debris.

Make sure there are no edges between unit 1 in area that are next to each other. Always level off.

Carl Dennis Pogue - may have 6 people coming here.

"Marian Bailey - English Farm Homes."

Sandy Morrow. New Information from Old Holes. All in MD

Bibliography or supplement:

If you do a plan of the top of the plot take down part small a specific level and map again. Keeping track eventually will get a step forward.

"Jens Karlshoff - Tobiacat"
Amen. Peter had 2 helicopters.

A Carl Maryland Metro in Baltimore.

Need $576 for provisions. Arrived today, will leave by 9pm. Need $38 for Thursday.

Withdraw 450. 10 12 sprce, 105's, 10 10's.

"Mike Stover"  (518) 584-7033 wants a job. Prehistoric.
Largely prehistoric.

P.S. Starts on 82nd. Meet at West Chester office or at Williamsport.

6 hours of work paid.

Great, things are changing! Next put out a series of discovery units into Area VII to attempt to break one of the possible prehistoric components. It could be a pit house or a fireplace for something. Take 1x1's down to the top of the buried A.鸫撑discussion at that level.

> get more plastic, another roll.

Art IC: placing #1 site along western edge in area I & II to attempt to locate more prehistoric features (ain't gone yet). A prehistoric feature in the #1 site Davis left in Monday 5/28 prior warning to work for Bowen. NEVER hire him again. Not a good worker, missing over half the time!

Art B: continuing to remove fimple and discarding brick.

Art IA: running between checkerboards, churning down to feature.

Art VA: expanding out to west. To west have a strange irregular walled depression intersecting the SW corner of the cella-hall. Tumbled-in nails, burned. Deer & porcupine. To east clearing out brick and mortar in feature that intersect - w? F? 73.

NOTE: Don't hire any locals that don't have transportation to the site. Norman cropped out & Mike Balchard can't get here or on time!

Call Ken, we need more flagging tape.
We need new photo log sheet.
We need Jeanie's topo map.

370 - 1363 = 2337

Talk to Charles, need more water.

Area IA: working around circuitry.

Removing feature + clay above edge of circuit where appears tilted. - to define circuit.

I had in area appears to at least be contemporaries of the general house construction. Breath during both 1st layer, metal tube and the 2nd. Flash guard against the house which is also covered by the clay cap. A post earlier than bulkhead entrance. The post extends by the flash guard also that much deeper hole thereby necessary. It may be the same as the hole the builder tried... meaning that at least that post is a contemporary of the construction of the chimney spot marks in that area. The second is in the very corner of the chimney town chips the edge corner of the foundation.

May 24. B.P. is a deep feature in the SSW corner of the cellar. Built in deep, long, and irregular walls and is connected to the cellar. It is filled with construction debris including burned rafters of wood. Huge 3 ½ inch pipes from the main floor of the feature extend out into the basement. The cobbled drain appears to be part of the construction.

Great brick masonry formed. From masonry fire got green chert from bluish chalky filled soil. Other fireplace firelicant in main floor formation well. Evidence of old support in wall and floor extends beyond masonry fire.

Oct 20. Finishing 1x15. Founding to test dimension features.

Still need to choose out systematic cattle feature. PS turn a yet.

Is a good. Had a short stick

"I wish you a good"

Return survey Lakeside 1

Dear Mr. Blythe, you have made great
at Wedge of pinion gravel about 2 m wide, sparse, bit of grass. Not much. gravel into little hollow feature. gravel just below stop end lunch plate probably. Site features created below it behind fill.

Dear B, and P. Box taken out. Dirt fill in new fill here. Old floor shown behind. NW corner have a square of certain brick 2 no floor broken here. Clean out corner empty in kitchen.

Dear VA: (p. 19)
Nudge,connexion 773 may be a pitch support. To NW of 17005 yard just this below corner 2 post section including brick cistern. Pebble just N of brick. Cistern attached to 773. Get a rough sketch of a section. Not pell = features. Large post holes side to side running N-S. To E of these post nothing - still contacts. One of them. Tell up gallery sized 1 per level. Utilization was
Vertical post set into clay. Runners (horizontal) between posts & plants nailed to that. Possible entrance way into cellar to west. Plenty in gap which joins entrance to cellar & buried planks along wall. Filled all at once—No layers of fill. 54 pounds of nails removed from there. Tilled in quickly.

Hey, call Mike Johnson. Call National Trust. Have Chack call friend in Annapolis.

$185.60 - HMD pay up

$5.445 - long term medical
taking from check

Normal deflections after
that

$92.80 = dependent
$45 + a payoff

Can elect a gynecologist, get form for Cathy.

Overcast, breezy in AM.
Will I.M.E. show today?

Judy away on Chucks business.

6/24/87
Clear weather, July 24th
Second day to Charles Cecile
Not to stay in Area A
Except for dinner until Cecile has
finished off the Harris Matrix.

Area IB: When the recent 17th century
firebox floor was removed to a sandy
clay layer directly beneath was
a light orange star... centrally located,
indicating where the fire was in the
hearth. Beneath clay was another
brick floor. Found nothing in the
corners of the room... decorated with
the foundation. Shallow floor above
subsoil.

(Monday) 6/29
Cool & clear in early AM. Will take
hot next couple of days.

MARK WOODS NEEDS W-4 FORM.

Our VA: Bill ready to open area
between F-129. Mark ready to
go into least limit to create into
a stairwell. Which goes well beneath
the cobble drive. See if I need
it... start next bunch today.

Call Charles about paychecks & W-4's &
personal employment.

Stop by office & talk about another
room.

Cloudy, looks like rain. 0 7/2/87

Our T.B. in the cellar in room A - 2 get of very small post hole paralleling the existing wall in the 56th of the NW. Found beneath the old brick floor and a green-gray clay layer. Taking up more floor to the E. 1/27 column completely excavated. About 6' deep, all filled with dirt in late 19th Century. Taking up 56¼ (diagonal) only because to expose other side and get dimension of cement lined walls and floor.

Last, humid, clouding in thru 7/3

Weather and rain visit at 10:30AM. Told them to wait 'til 2PM. If they can't listen.

Area A: possibility that cut through door in a corridor, a below ground好奇心. Not a good possibility yet...

7/8

Very hot & humid!!! Business as usual. No new info. Monday Dan Wagner, the soil specialist & John McCarthy were here. Confirmed T.P. is clay in area VT. Due to est of cellar hole cut action.

The green clay at the base of the

Celled vents in the wall had no structural value as may well have been used as a water shield to repel the water which is easily passed by the fragipes in the walls into the cellar hole. Dan was baffled that no water was passing into the cellar at this time.

Several more small pretentious features located to east of the large pretentious feature.

7/9/87

Hot, humid. TOM WILSON MUST NEVER RETURN TO SITE 66! AN ENEMY!!

In room A of cellar H nearly beneath the brick floor which underlies the cement floor. This brick floor is level N to S. On west leg is gravel and small post hole feature, 2 small lines against northern wall. Probably for storage. No east room floor is Clay. Artifacts: pottery, hearth, 2000x, 300x, shell, bone & flat glass. (No char at 0 degrees.)

In Area VA extension appears to be challenging with the swell. Had one high mechanism, 6 triggers, thousands of nails and battering debris. This is the house debris from the destruction. Not in Fls!!

NOTE: I think we need to do job. 

I D N R H.

Here all of southern end of 
the 2 x 2' s were exposed with exception of the splash guard. 
Will be removed in fast next 2 x 2. 
Western I need to go over. 
Many post holes located 5 to 6 ft. 
A trench in southern 1 x 15 of the 2 x 2's.

Depression - maybe a trench but 
Don't have southern edge of it. 
Could it southern latern - be 
Made of wood?

In cellar of New house (1B) 
Door divide Room in Room A 
Cutting across 2 X 2's row. 
Third 2 x 2 will lead to north well 
of men's basement in line with the 
Fireplace support and bulkhead 
Enterey. Above ply middle west 
Wall hope the support of the 
Men's large stair and small 
forth level pier support - 
As it seems, have stored much 
Relic, some probably attributed 
First set of support. 
Maybe a 
More is a set of pier in 
Our lower support in center possibly, 
Effented b N.

Total: 276

416 - 1,5
left sick at 9:30 am.

D. Weinberg will see site
photographer. Has had previous
site experience. Have to tell K.F.
now. Will head to Kerr by
August and no doubt.

→ Cold & clear today.

Tong has complex of features in
area in 1st row NE corner of
Mensa House. Feature which overlooks
features and extend down along the
side of the Menæ house. One deep
one has a reinforcing beam in it.

→ Call Anna back this ten!

→ 76-79 Mølen.

→ Talk to K. Fleming.

→ Ask Eric to get Menæ & Bug spray (50,000)

Area 1E may have lead to "tunnel." Tunnel
upward to W end. Much debris
Centrally from N end of cellar (54). Lot
of ceramic material including Waterford,
Delft, lead painted porcelains, etc.

Take more film this weekend for development,
1 more rolls each.

7/15

Length published read in Area 5E
have a large dark feature which
may be a cave or bed.
Shell high in fill. Several post in fill and beneath fill a multitude of post holes. Could this be scaffolding? Maybe 2 prints - original & reporting.\n\nSome post maybe rotten in place, some indicate pulling of the post. Wouldn't keep shape if pulled out. Have small buried trace beneath splash guard, approx 2cm wide. \n\nPlan in which post hole found (lower layer) has I termed landscaping?\n\nArea II: there are footing at grouping - there are also a large center piece of creation but they have destruction debris beneath them I should come up. \n\nArea I A: need to have reason to design footings. Can clean below and a long way have reason to resign. Multitude of post features at other of tenant houses. Re - line in one of the several post holes may be the result for a lightning rod. Appears to be possibly as many as 4 post at wells.\n\n2 rooms in main Astor Cellar. One large of kichen as a partition.\n\nArea I A: trench to N in proven to be different from S. House debris apparently shoved into trench that may fill in SW 1/4. Believe N to be an open pit.

To Do: 7/17

- Call Kathy Barrows about workers comp.
- Call Linda Hamilton about money.
- Call rental trailer dealers about replacing front brake. (301) 372-8100, Allied

Also tell Linda about Casadee's last name - not Casadeer & give her Kathy Callum's final check mailing address - mail Dennis' check there too.

1A: Remove all features from top of terrace fill & take 'em down to below.

1B: Remove 1/4 of brick floor in 1B to leaving floor articulated around fireplace. Will remove 1 more unit on floor of below.

1A: chunking out 2 units & excavating structural post features.

1A: will excavate to south to expose any structural post to St. to expose remainder of "tunnel" to north in yard to expose 18" on yard surface. To SE to expose 18" from construction.
TUES 7/21

The "tunnel" from A to C possibly a former entrance for slave
people? Large Cook for storage
in the cellars "Out of sight, out of mind."

Extremely hot this week.

Register of prehistoric petroglyphs?

Call Ken about paper bag.
Call Kathy Bender about van.

Expenses form for John.

30 8 2x2's around corners
of Mason house, 2 on each corner.

7/24

5. Will the "couple" live in separate
homes? Will HAVE TO.

6. Send someone for ice after lunch.

Process happen quickly, heat, help along. Nelder cella.

Hope brick cookable in
oven. Brick would have stood.
Eventually, red "dirt" remain in

8/15 need 445-50 for tests (didn’t include 24: for self).
(2) And the proposed "health low"? Dr. Bache's objection?
A) Locating the center point between the two line up to center of F6 or to center of F73 the chimney post of potential radial style house?

Q) How to explain large grotto which are beneath grad. layer? Early 17th C. can fill in it. Another evidence for destruction of radial building?

(3) Believe F6 was built by John Addisum who acquired 6,478.5 acres in 1687. Quoted from Steele. The fact that he was Thacker, elected to build an elaborate mansion at the site in 1710 & 1711. (Castle 175) strongly suggest John Addisum had developed his principal plantation there. (G.W. 1884: 67) So F6 after 1687 & given to J.A.'s death in 1705 & 1706.

TC:
(1) Deep hole which angle Nancy the site of a privy at different times. Hunt - common taken wood privy. Well for privation which left so marks. Frequently kept in some general and even time moved about when fall.

Added 375 for TH & FRI.

205.59 ex penditure
2. Hone confirms gravel road in formal garden path style.

3. Buried Abbevian or Age Sol in depression of shallow gully pointed out by Don Rayner. Makes sense. Data shows off clay + thore coated tephril 87 it into gully + accumulate there. Hence only in lower end of Area IC to south in large form shape. Roughly 8'1" bed A.

4. Apparently roughly 21 m to the brick layer + post beneath it and to the G&W empty cell in Area F.

A). Roughly the same distance appear. Mason celling + largely north of the former house foundation however for the center potential storyline. The central to south. Mason's measured TM EW by 5m NS.

3. Mason lined posts holes unusually
John McCarthy

Put window screen in basket (fiberglass), smaller diffuser from 1/4" feature to floor.

Have B.R. & Barry three read the field operating manual on what details need to be gotten.

Move Better Fritz to Anac. DC.

Watch Wonderly - will goof off if given a chance.

Dig paper at end of area 1C, where the brick is next.

Need to think about what do in B.R.'s area. John's tank center section left as a giant bulb, is going to be big. Potential safety hazard. Needs address. Perhaps get word for bobo.
2. Check out Judson - Annie natural.

3. Talk to Betsy Y. about mapping - done.

4. Appears we may need more water.
   Talk to Charles, check tank.
   What else could be problem? 6018000 gals.
   A. Not enough pressure - shall we try 8 gals.

5. Call Linda about money issue, table 157 Ken on Karyn, about 6 day.

Question:

1. How wide is walk in Area IC?
   Answer: 5' 8.5" or 4' 8.5" or 148.5 cm.
   
2. How do IC feature line up?
   Orientation? Possible side structures?

3. Address: Which features in 1A to excavate?

4. Examine Cecil's matrix maps?

5. What is Betsy's feature? Small rectangle hole at cobble 10 cm below surface.
G+H History: says closets were rooms upstairs to re windows. So why "peach & little pantry"?
Oct 14th, 1986.

1. Call Ken, get info. Then 8/7.
   - Get letters for photo boards, or have him get some.

2. Charles Sten, S. Hawaii (Far for Co. Crl.) will be out at 10:00AM.

3. According to Mr. Walters' diary, the present in 1765 estate was large. Not in 1727. Deputyomo, it's found from top of VA collection field date 1727. Probably for the filling or the portion of the field called open water later that date, though no soil on the cobble path.

4. Ted must leave Wednesday evening & Roxy too.

5. **Do a Sketch Map of Area 4 VA U**. What we have - Johnson & what we think on next year of another design.

6. MI: Post hole, stone, contour, cellar in yard, 2 lines, each 10' apart, from each other. 3 sets of dripline to the north. Opposite line of post extending past from F129 also.

7. Get maps VA C from Betty.
VA Priorities:

1. Excavate known sets of postholes in "yard" + p.m. chimney

2. Excavate architectural features at end of passage.

3. Expand and excavate other features in yard ie excavate unit 5 of cellars to find structural posts + once have linked up then excavate.

4. Excavate trench in cellar hole along west wall if time remains.

Bob Kingston arrives 8/10 to excavate prehistoric feature since we don't know what we're doing "according to Dan."

9/11/87

Cutting post for later
split 187, 229, 299. Take out posts must to think as plant 299, 291, 289, 290, define edge of brown grass seed

Hot & humid today

1. West side of Mason - Area 15, large slope away from edge of Mason home. Similar to Area 11, slope of fill away from Mason home. Make a small rise kept around house to drain water away from house.

2. Area 1C: Katherine has 3 small brick pails off southeast end of mason home. 1st step west of mason, by a brick wall. Mason and others at west edge of 2x2. Both along southern wall of 2x2.

3. VA - Stang celler had 2 small cells w/ dirt fill (green clay) in between. N't had one layer w/ dirt in back, green clay, plaster over clay to front.

8/24 - Have 330.
need 330 -

8/24 - Perdien - 611.00

8/25 - Perdien - 409.00
1. Charlie may be out in Pit.
   John M. will be out today - stay 'til tomorrow.

2. Area TH will be complete today or tomorrow.

3. National Park Service - crewed by Steven Patton and company, put tomorrow - make self known to Steven (Dr. Patton to you)

8/21

1. Current trouble - need problem (John P. to ER)
2. Elizabeth Tyler (Today or tomorrow) -
3. Pat O'Neill - Monday (all week)
4. Wally - Antero TH, PM, with FR1
5. Dana 2. 9/19.

8/31

6. Larry Moore - non-permanent, guest -
   Sandy for 2-1/20
   problem for 20 for 5 days next week,
   problem for 21 for 1 day 3
   total of 12/12, etc.

8/24

Chris: 16.

Superior: 6

Problems:
1. Don't have work on extension so can't get backhoe. Can't use IVA so can't take out 2 lines of culverts in PC and finish the area.
2. Becky Roman complaining. A chronic problem that's getting upper level management including John M. in
First water of Dan. Glad to talk w/ Tuesday. Pat O'Neill has arrived. When he's in field goes to Area TC to check out limits.

Second cistern, north of concrete cistern is another, earlier concrete cistern. Under excavation debris and the mound of fill which created a small hill side to the manor house. 1st cistern found only covered w/ destruction debris. 1 piece of projectile point found in fill of 2nd cistern. 2nd cistern is 1/4 exposed.

Bench on west side of manor house has strange alignment of bricks beneath pad. Some angled to pad and others at 30° but not random. Talk & stand in.

Very Ethel & Bruton from Ken 9/12

Hot & clean.

Bench is w/ green Mount. Two hydrolic hoses broke down today excavated 2/3 of core. No trenches. However, bench has to stay true strong & broke alternator. Will repair & return tomorrow. New full crew minus Pat O'Neill. Sent to Penny Pt. 1/2 Friday. VA. posthole may turn come. Have identical but missing in some sets of posts (4 in all), these separated by 1 set of post hole ~ about 10' apart. Maybe structure comes...

Area VI: garden terrace 1250 sq.m.

Artifacts recovered from 8 of 41 shovel test pits - brick frag., window glass, light green bottle glass - no concentration.

Large volume of fill w/ brick rubble.

75 linear meters of trenches, 1944 area = 13 m²
1st scale test pit excavated

Area VII: 750 m².

Artifacts recovered from 13 of 16 shovel tests.

1863 survey suggests structure in area. General pattern of domestic & architectural debris extending from possible structure toward center (plumbing, whiteware, machine cut nails, window glass, green & clear bottle glass, brick frags.).

Build. 5'07; in 75 m² sample reveals structure.

Area VIII: in depression off the north of the Manor house. Light scatter of cultural material. 500 m²

Artifacts in 4/6 shovel tests.
Area IX: Located ridge spur southwest of garden terrace. 1050 m²
Coordinates: NE: 5300 E/190, NW: 5300 E/155,
SE: 5370 E/190, SW: 5330 E/155.

Artifacts in 11 of 17 shovel tests. (Tests 6
Artifacts concentration associated?)
2 structures depicted on 1867 survey
may have been defined.
Artifacts: clear bottle glass, machine
nails, gray stoneware, brick, shell,
metal. No function suggested. - 85 m²

Area X: 40 meters east of the Manor
home & north of Ashley
family cemetery. 625 m²
Coordinates: NE: 5235 E/320, NW: 5235 E/295,

Artifacts in 11 of 18 shovel tests.
3 test units. Concentration of brick
mutilated in area, also - hand wrought
nails, window glass, light gun stock
Glass of tobacco pipe stem.
Associated at a structure. The
relatively minor amount of domestic
material found at the location suggest
utility function. - 30 m²
Area XI: southeast of Area X, Concentration of architectural debris, 300 m²

Artifacts recovered from 7 of 12 short tests: 1 m² test unit. Materials recovered include brick, mortar, machine cut nails, window glass. Materials associated with a service structure, lacking domestic debris, 15 m².

Artifacts in 7 of 10 short tests 2 m² test unit excavated. A structure on 1863 survey drawn in area. A mound of brick evident may represent a collapsed chimney of this structure. Artifacts include machine cut nails, brick, mortars, window glass, plaster, shingles and shingles. Quantity of domestic material recovery is for now suggested - 15.0 m².

To Spec - Needs 4th crew. Leader Area XII
straight thru - 10 wk schedule -
John Thanksgiving.

Hypoth. C.C. (Tolles)

(1) wall much - for addition 15-30 sq. ft.; scaffolding - full - more pits. Late 18th/early 19th c. full-plastered extra thickened. Ground floor along side of house - par. Edison one level full. Full brick 1st. ground floor full over entire area; joist areas. Full brick first story. - pit brist. finds.

Cellar UT

yard & fort. - 3 periods of occupation. L-shaped binding. 9 contention frame. addition 27 yard feature 3. track 4. Late occupation 5.

Early structure 27. cellar & addition (w make) which burned in 2nd quarter of 1770. What is fort & bricks? Tentatively that it's been a home occupied by 1st F.A.

Plantation - 4 periods of hist.
Additions - pre 1750, post 1750.
Burns - 1850, great farmers.

Proven A. earliest area pre 1750, post pre 1730
B. Dutch manu & associated activity
C. prehistoric

UT - est. yard - added bulkhead. Some evidence of side addition would be taken than bulkhead.
Location - artifact from 1700's, most from 1800's. One spilt date - Bury Penard.

Tenement - improvements, clay cap, chimney. Or artifacts.

18 - fireplace - 2 stages. 2 floor. Top (1/4th), better progression. 18th. Possibly c. 1815-20.

Deed indicates built by 1728 but probably earlier than 1760 or 1780's.
1. Cross Elizabeth Tyler for a date of departure. Need to know by Monday.
2. Remember, get new portfolio for Betty!
4. Get new crew chiefs:
   A. Ellen Armstead, or
   B. Betty Cohen.
5. For new crew chiefs, they need to go to Dam not 16 before George.
6. Lead 22 and crew members in the field at all times.
1. STRATA
2. 4 discrete phases
