Digging north half of Fea. 265.

Bag: 3943, soil: 3944.

265Z01 artifacts: A large sherd of c.c. ware (?), molded border in shamrock (?), pattern (similar sherds have been recovered elsewhere from Fea. 200 fill). Interior-glazed earthenware, blue-grey saltglaze stoneware, shell, brick, slate, bone, and flat, clear & green bottle glass.

Also, a basal sherd of red-overglaze decorated pearlware (similar sherds seen elsewhere in Fea. 200 fill). Artifact quantity seems to be increasing w/depth.

In afternoon, S.H. resumed excavation of south half of Fea. 265. Bag: 3945. Dug through red clay to 3.74 cm. b.d. (datum: 5204.1/230) (150 cm. below Fea. 200 floor) and

(A couple of brick frags. visible on surface at time of excavation) During chunking of units south of the S197 line (Units 982-984) to find post holes, the area above FEA 269 appeared to produce more artifacts than elsewhere along line.

FEA 269 south edge is at the north wall of FEA 200, in Unit 1012. FEA 269 extends north, increasing in width, to the S197 grid line. FEA is excavated as 1F100Z69302, Bag 4116, soil 4117.
