Addison Plantation
Very cold, a clean. Most of the leaves off the trees. All the locals plus Jeff, Doug and I went. Took a ton of the site. Hauled Daniel's old water screens, clearing brush. When we got tape started putting it in a grid on the 5250 E 300 point. Pulled to 5200 E 300. Put stake in at 5 m intervals in the area to be excavated. 10 other wires.

Most of the crew spent the day clearing brush. By the end of the day under V, V-A and V-B were looking pretty good. They got rid of all the big stuff as well as vines, sticks & very litter.

Cecile, Bill, Doug - all putting in grid. All day. The check board of V-B is pretty far off. That we were hitting pretty close by the two other points. Left in the area. We extended the S - line into area IA. We are going to truck a large pile of...
pulled in this area with the last cat we are supposed to have. So the line is deemed sufficient by the line being well put on grid. As often we decide whether not to remove the bubble by hand or mechanically, I have met the last min. sheets & they are mine. We bagged the 20th century stuff a pot later so kindly left us near 5222 E28th. They were very systematic. Even screened the clink. Jeff thinks what they left he picked up elsewhere. Sounds possible to me. We were getting older stuff out of that hole.

All in all the site hasn't been too badly disturbed. Considering the newspaper article at all.

Things to do tomorrow:

Screws
Drying racks?
Elevations
Dig 1x1s in SB
12 Nov 86

Cold in the morning. Going to be a nice day. Started some folks excavating for the Tarrow well. Other folks fixing the screens. Mike R. Mask & I putting in stakes on the S210 line. Later put in stakes on the S205. Did a topo survey of all unit 725-205 line. The road is in fact. The Maryland Geological Survey marker is at 55.6 meters above sea level. I'll have to convert.

Set up on S225 E260 Elev 62.25

\[ V \theta = 150 \text{ (2x2s)} 120 \]
\[ 175 \text{ (2x2s)} 90.7 \]
14 Nov 86

Bright, cold. High in the 30's today.
Crew chiefs finishing up m.t.s.
3212 E310 - Mike & Cecie
3214 E306 - Betsy & Bill
Finished larger A. Starting larger B.
17 Nov 86

Lots of new crew today:
Ann Dewos
Tara, Fred, George, Mark, Eric
Husen & Mallott didn't show up.
Cecile opening up the south half of her 1x2 S218 E272.
Bobby piling 1x1 her during the last phase.
Bill opening up a 1x1 at S211 E276. There is a tree here.
Cecile's layer B is crumbly red clay overlaid with black. Does not look like anything else in the area.
Betsy recording 2x2.
Mike's recording 2x2.
Mike's crew dug in to the west.

Bill's crew found sterile 1x1.
So it's Cecile. Cecile has a 1x1 test unit in her unit. Test the corner through.
Amorphous
gray
grit
charcoal

Betsy's Squaw
Betsy & Bill down on the top of large C'. The entire unit is filled with weird things. The original 1x1 had two features. The entire west half appears to be a grey Chablolle flint fill with deteriorated brick. Here is a clay spot on the west wall. Brusher. See map. Then arc
The feature previously defined as 35 is a dark grey stone block. Charcoal. Circular stain is either part of tree.
Cecile has gone through several sterile layers of fill. All have been very distinct. The top soil was black loam, followed by red and black silted loam, followed by crumbly pebbly red clay. The crumbly rich subsoil. We surmise that this is overburden for the excavation of the Dee house. At the bottom of this fill is what appears to be an original ground surface. This is a compact brownish soil with black flecks. A single corner of brick relating to the next house runs through this unit. This will receive a further note. Cecile crew will move on.

Bill has had the same phenomenon in his unit. On the edge, after the sterile fill, he has finally come up with the same ground surface as Cecile at a second where there is half rich subsoil. This is probably related to the telephone booth structure. On the x-
...to the south they have found the ground surface but no features.

Betsy grows up in an older 2x2. The original 1x1 had feature 31 in it. Some of what is the others with a good E/W edge.

Mike grows on a new 2x2 too. Both through level A.

Weir straightened out. The reclaiming & recording procedure to my satisfaction. Got trailers & facilities. Did like to see the dirt moving faster. Still no water.

Why did they dig that big, deep hole in between those buildings? Was it ever used? What is the purpose of the two around it? What is it going to be a structure or just be pretty small if it is.
18 Nov 86

Cold (no kidding). Cecile mapping northeast wall, feature 42A (underground), B (brick wall), C (inside). Bill extending east near iceshoe. Continuing door south of our house. Betty on large D, Mike finishing B. The north side is all low scan. Feature 30 covers the south half of the unit. These are dark grey brown linear stains on orange clay matrix.
19 Nov '86

Cecile opening Layer A at 5217 E 271. Layer B at 5218 E 271.

COLD, WINDY, CLOUDY

Only got in 5 hours yester-
day. The "R" work started
at about 1:00. Paperwork to
regate to us to continue.
We have opened up the
entire 6 x 4 m area in area
B3, and are working on
way out along the perimal.
Many things are happening
in this orch. we have two
parallel lines nine feet apart.
In the west the feature (as
it is called) is different;
Definitely obviously broad.
Perhaps the height. The hard
part is the west edge, ct
is not distinct at all. There
are also many perinal
plow scars. Ad Poli featur
fungus activity. What can't
be figured out right
now. Mike, Ken, Son, Dan,
Tara, or Linda. Pat's - Eric,
David, Pat.

Cecile opening up to the
former of the man hole.
The line of the south wall
is very distinct. One now
of bricks showing, with very
distinctive fill inside - outside
Bill's crew are the worst story. They are dragging in the edge of the brickstone. The marks from this area are burnt, and very well preserved. They are of all types - en unadorned around the edge of the building the interior has more ceramics Spanish olive jugs

Staples

Three hole punch

Copies
24 Nov 86

Cloudy, rainy, not too cold.

New crew members - Bob Cochran, Bonita, Rose, Linda McCargo.

Past Mirth didn't show up.

The BobCast died.

Cecile opening new 2x2 south of the building corners. This is going to be a test of water screening.

The northeast unit we will put dirt in a bucket to take it to be water screened to compare the results with dry screening. I guess we're trying to get out of water screening. We'll test one bucket for each layer.

Bill opening 2x2's 1x1's so fast we can't keep up with him. He has a very distinct edge between an area with lots of mortar/plaster and what has been labeled target - an orangy brown Charcoal plastered edge which appears undisturbed.

The edge of the cobble drive is too spitfire too work with. Can't go further south because $225 is the boundary.
The area.

25 Nov 84

Clean, cool. All present. Fast head can trouble yesterday. Eric & Bill # on # 2. Area T &. Cleaning away rubble.

Ciciles crew moving slowly. Any put chips on the screening path so we wouldn't de-contaminate ourselves.

Barry, finally (due to rain) finishing 2 2x2's. Opening two and 2x2's to the 50.50.

Mike finishing west 2x2 and east 2x2. Opening a mouth with me. Major ant. part out of east 2x2. Bottle bottom three anomalous features.

22 2 278 - 1.72 56.73 2 2 2 2 214 3 304 - 1.99 56.46

2.18 2 270 - 1.52 56.93
28 Nov 86 Fri

Present - Me, Jeff, Bill R, Betsy, Mike S., Tara, Linda H., Bruce, Bill H., Becky, Rick, David, Mike RC at 10:30.

Have opened attic window to let it dry so it can be cleaned up. We're having a dog show on Monday for the successor to surface mine. Only Bill R & Becky in VA today. Becky going up another 180 after school by the county of Education. Bill digging at 1x1 footer north for the concrete. I think he missed it.

Eric & David hiked the path up in the gully after Jeff, Don, Bob, & Chip got hit stunning across in the rain on Wed. Yesterday was beautiful; wouldn't you know it.

NEED TO FINISH THE TOPO MAP.

Betsy & Mike's crews working in DB, opening and finishing 2x2's. The place is a much hole, all of it will have to be bonded.
Monday. Did like to see what it really looks like now.

It is waiting for the mine to subside. Hand work on Wed. got the tree down and the rubble work pretty good now too. I think I will do a gang shoot then and it.

1 Dec 86

Partly cloudy - 18° wind chill factor. These new people, Dean, Wigner, Peter, Proizm, Ray, Turkey, Ann, Davis Idelet.

2 Dec 86

Ann 11:30

Very cloudy, not supposed to rain. Rained anyway. Bailed out 16:1, after a minor change in drainage trench. Area okay. Need more pressure on JA.

Still writing on the water system. Hope to build a shelter for the generators, the pump, etc. Cheryl will be here at 1:00 to teach us.
about flotation.

4 Dec 86, Thursday
Clean, cold.
Mike stringing up one TA - 2x2's to take off the 20-30 cm rubble field. John says we have to screen the rubble.

Bills crew hunting to the NE corner of my South house. They have found a definite line of power going yellow to from stil. Shown black under fill. Lots of lines, see with no definer wall

Bolto's

5 Dec 86, Fri.
Very cold, sunny.
Past not here. Everyone else on the job.
All 10 2x2 in the south portion of TA open.
The south area is clear.
The west area is clear.
There is wood fill underneath the rubble to the east of the stairs, cut in brown rotting fill. The building corner has been nuked by a tree. The west to the west has a perpendicular
wall extending for the main wall. The staff dips threateningly in the east.
shift of the brick down for the 5th floor testing. Mike messed up the wood...then fixing them.

Cecile finishing up the profile of Gandol next to excavation. Really neat stuff.
Cecile crew transferring to TA.
Bill's crew opening massive windy area - search of the brick house.
House convinced Jeff to leave an E/W balk. 2/17 F. 6.

11 Dec 86
Very cold
Betsy, Eric, Bob, David
Bill, Norman, Bechly
Cecile, Peter, Sam
Mike, Linda, Tara, Bill, George

11 Betsy opening 2 new 2x2's.
Bill open in the area.
Everyone shoveling in TA.

Mike & Cecile have exposed the north wall of the manor. The east corn was destroyed by trees.
Bobby's crew finally dug to 4 ft in the east 2x2. Really hard to screen.

Bill's taking away the rubble to the east of F10. Looks like the tent was built while the building stood. Betcha the central area absolutely lots of artifacts and Deese's been gone for all winter. Post sanded 4 inches. No evidence of the in between parts. Were they using the kennels?

Mike & Cecile have opened up 604 sq. meters already, have a direct north wing. Very small with mostly kids. Just a hole filled with ash in the central northern part.
8 Dec 86 Mon
Cloudy; high possibility of rain, 50's.
Bodies present:
Mikes, George, Peter, Sam, Ann, Mike, Bill Jr., Tara, Linda, Norma, Cindy, Barry, Bill R., Mark F., Mark W., Buelcy, Butch, Bob, Don, Diana, Chris, Pastel
About 9pm

A good portion of the middle removed from the 228 line.
The depression is strange.
The brick flooring in the
north wing was unusual.
There is an area to
last and a second
perhaps third course of
brick.
Peter working in the brick
area.

Norma has a third layer of
styrofoam below the brick at
the cobbled road.
Red clay underneath.

Bitsy crew spreading
vegetables and building
a dike for the impending
deluge. Need to tamp down
the dike so it doesn't
sediment into the area.
Was enough for water
this morning. Doug and Bob
farming in.

Mark F. says Bick's dug out
cow, sheep, pig, people, etc.
Bick going to take down
the eastern units in hopes of
finishing a definite world.

The eastern in Bick's area
can't be cleared because
of impending rain.

Pete was saying what looks
like a small structure in
stead of a brick drain.

Somebody excavated the
circles in the wall
apartment. He and
the unit
didn't really remember
what it was like. But
it's gone.

Ammunition excavated
part a tall chimney
wall of the north wing. Must
like part of the second floor.
9 Dec 86

Rainy cold, all present but 1 Past.Betsey excavating 2 2x2's.

Work proceeding northward in T.A. Fallen wall being removed. White cell is separated from the black rubble from the house. Just shoveled out but give a separated by that.

Bill finally found a brick pier. Perhaps this is the entrance to the cellar. We missed this feature in the last phase 1x2 by about 2 cm's.

We ran out of level tools at the object next to the rising driving around in the rain to get copies.
10 Dec 86

Once again everyone has different times. Got it settled. Betsy's crew found out to other a crew because it's too wet to work there. Bill working on defining the boundaries of the brickhouse. Taking with the top frame fill to Chapter 2 in to the building.

11 Dec 86

RAIN. Here making Drummond field work section. Jeff came over 3 sands. Joel and Dan Roberts were going anyway. Have to be out next side at 11. Stayed until 1 for lunch at the seashell. Worked on Betsy's ramp for 3 hours during the evening for 3 hours. Betsy, Charles, Bob, John, Dave and Mel present in the rain and cold.
12 Dec 86 Fri
Cold, cloudy. For a change, the entire crew, including Pat, present. Took well in Betsie's area. Put down wood chips.

13 Dec 86 Sat
VERY Cold, Clear.
Mike, Linda M., Ray, Sam, 13, 11 H.
Bill R., Becky, Norman
Betsy, Ercy, Bob, David
Jeff, Jeannie

Took elevations on Mike's balis. He's running them now. Including the in the unit of which they are the SE corner. Work along the grid today. Need a small scale map of the area.

Bill R. fishing. Thank W.S. W.I.T. This is tall very weird. From another point of view I'm at a point they talked about what we were going to do. While talking 2x2 NS & EW out of here. The NS trench will hit a wall on one way & the other. My previous belief is going down in the
EW one. Bill finishing units drawing profile. Preparing to dig.

Laying in I shaped grid with pins 2 meters apart. He can lay in the next of the grid from these pins.

15 Dec 86 Mon

Clean, going to be relatively warm today.

Present

Betsy Bill Cindy
Dewey Biddy Sue

Linda M (8:15)
Tara (8:15)
Pete
Ray
Cracking the whip this week. Betsy cleaning up the canoe. Finishing up the western 2x2. Don't know in the trailer for 3rd. Trouble going very slowly. The ground is soggy well. The only possible time from trailer will be 7:30 to 8:30 in the morning.

Cecile down to the Meals house, crushed brick layer. This is really poorly laid brick. About 10 cm thick.

12/11/86 Tuesday

Clear, cool. Supposed to be beautiful today. Betsy, Eric, David, Sue, Diana, Pat, Peter, Ray, Bob, Bill R, Beety, Norman, Mark F, Mark W. Cecile Don, Bill H, Sam, Mike S, Dave, Tom, Linda M, Mike R, Ann

Dot photos after work yesterday at EB. Then again this morning when there was good light. We have a good view of the post holes. Several very large ones plus dark cracks. The new scars with NS and EW are very visible. At least 30 more post holes of indefinite definition.

Bill getting 2x2 photos too. The edge radically extended under the dump. Drawing in the edge, entrance, and scatter. Trying to finish up the lines where the trench will be.

Curtis working on the shed today. Pug a post hole that Raina quarreled about. It made it most of the way in. Now he's doing the post hole quickly to well. Getting down to the large at the base of the structures.
Mike cleaning off ceiling.
The bricks in front of the chimney.
Dinner, picking through the garage.
Deterioration how the stairs relate to the
understand its pretty
slopes that the stairs
way was built after the
hutches. Pretty unity
with the first stuff.
Have covered the awning with black plastic.
Hope it will stay.

As usual at 2:30 p.m.
12/17/84 Wed

Clean, cook. Rain forecast for tomorrow.
Mike S, Donny, Tom, Ann, Lindatt.
Cecile, Bill H, Son, Barb, Mike R.
Betsy, Dave, Eric, Paul, Diana, Ray.
Pete, Bob, Sue, Linda, A.
Jeff, Summer.

Bring out

Mike digging the last row of 2x23 at TA. Finding nails.
Harden wood. Yarrow pits.

12/18/84 Thurs.
Rain. No one worked.
Bob 3½

12/19/84 Fri
Wait and sent spray feature.
Unit in front of retaining wall.
EW trench not to hit Anna TA.

Betty, Eric, David, Bob, Diana,
Sue, Ray, Pete.
Bill R, Norma, Zechy, Mark F, (7:30)
Mark W.
Cecile, Bill H, Donny, Borry.
Mike S, Ann, Son, Mike R, Lindatt, Linda M, Lana.
Past not here. Son at 1000.
Bitchup area very wet. Worked in it anyway. Eric working on track 49. Looks like a break now.

22 Dec 86 Mon.
Only six more days to go. Crew drastically declined. Too much to do - too little time.
Cool/cold, clean weather.
Cecile has finished Bitchup place. Bob, Eric, Peter, Roy still here. Feature 55 goes. Feature 31 in area VB.

Finishing 5 1/2 ft. 60.
Profiling/Photos
Everywhere along the line
it was decided not to
take photos of Pete's profile. He's digging the south face.

Dirt flying in #6. Bill, riding the hard, had a wild. We kill trees here today.

Doug was chief for the day, but I A. Taking out
Darth Vader 112 I indeterminate stuff around it. George
skulling, too lazy to do his profile. Which at understand he was told to quit digging on. Tara
finishing plan drawing. Also stick retaining wall.

Mike R finishing pot hole at Machinist's tool house
started.

9:00 am

Bill R. struggling with trees.
Bob & Doug off to get the water. Unloading
out of hefty bags.

9:15 - Eric drawing profile of F. 49 finally.
2:30 pm
Design nothing on NW corner of I-6. Finished profile of west wall pit. Trench dug out at missing wall. Half section. Per. 76, Brick Floor. Strung the thing going on with the bucket.3
Dug starting 1x2 for the 1/3 trench next after the big pit.

NEED MORE PEOPLE!

Mike R. working faithfully on Post hole 58.1

Bill R. has found a large fire hard at pit in the rear of E. Looks to be about 2.3 to 3 m. diameter.
Trees down: only one found.
John working hard. Putting his crew.

Chair seems to think we might want to stop when becoming cut. He wanted 2 hours. It'll be real tough on Monday.
1:45 p.m.
Tara bottomed out and removed into clay with brick inclusions in F.70. Laverne C.

2:05 p.m.
Dare has found a tunnel of
bricks under the clay cap
north of the pit. Appears to begin just 2 weeks. Distant line
just behind retaining wall at
B.".

Bob's feature done. Tread
and to be 2 squares joining.

Mike R. doing a good job on
these's post at front house.

Red brick area seems to
extend under a sterile looking
yellow clay cap in the
steep area.

3:10 p.m.
Took field across to the
icehouse. Went through
about 10cm of recent
excavation or garbage. Then
about 20 cm of grey
fill. Observed no artifacts.
Then about 50 cm of
strong brown clay.
Wed 80.00
for Charles

I would say that the cackle at the pit base was waxed in top soil for 26 years of it being open. It might be worthwhile digging this out to get a FAQ, I don't think it's very deep.

Bill washing away at the 1 x 2 with the 4 trucks. Everyone else putting along.

4:45
Tara found some trash under the hogan. But not all the way down.

12/24/86 Wed Xmas Eve
Raining cold
6:20 a.m. Linda Hanna called
Mike S. still sick
Cecile called
Mike R. got Eric called
29 Dec 86 Mon
Yuck, cold, cloudy. Having to
pour everything. TB is a
means again. TA tripped
boke & it's pretty grungy. It
needs to be Chrismed, con
verted, & redone.

Linda, Ray, Norman, Mark, Susan, Eric,
Bob.

$55 left in can

Cecile taking out SB, guard
at F. 2. Ewe doing this
very slowly. New appears
to be a grey clay layer
underneath. Sealing was
awful. Bob & Ray screening

Mark W & Susan digging in

Mark F & Bonnie finishing next
home.

Linda Mc finishing F. 70
30 Dec '86 Tues
Cold, cloudy.
Present:
Cecile, Eric, Ray, Bob, Bill R, Norman, Mark W, Susan, Beaky, Doug, Linda H, Lindlatt, George, Mike R.

Cecile starting F 48 with the IA crew. Greece George + Linda H to Bill R. Doug, Mike R, + Linda Mc. w. the Cecile.
